The big attraction at the County Fair was this charming "Home of the Year"!

(of course...it features a modern gas range!)

AUTOMATIC GAS BUILT-INS BY GAFFERS & SATTLEK

Have you noticed how modern gas ranges have a habit of being seen in the best places? (By invitation, certainly.) It's merely a matter of choice. When smart builders and smart home buyers get together, the result is bound to be a smart kitchen. And that means gas appliances.

If you haven't yet seen the new automatic gas built-ins, treat yourself soon. Take a good look at their automatic features—including the amazing "burner with a brain," meat thermometer, and rotary barbecue. And when you're ready to buy—a new range or a new home with a built-in kitchen—make your choice a modern gas range.

R. H. Walter, Balanced Power builder of Sunset Hills says: "It's no wonder why Balanced Power homes are so popular today. It's just common-sense to want the best of both gas and electricity. Each power can do the jobs it does better, faster, cheaper. Electricity can run the lights, TV sets, and small appliances. And gas can do such important household jobs as cooking."

This Model Home at Sunset Hills is a duplicate of the Los Angeles County Fair "Home of the Year" which was selected for exhibit by the Building Contractors Association of California. Viewing hours are: weekdays 9:00 A.M. to 8:00 P.M.; weekends, 9:00 A.M. to 6:00 P.M.
